The Journal accepts diverse submission types, such as original research articles, case studies, personal narratives, and letters to the editor.

12.0 GENERAL RULES

Authors submitting to JIPA affirm the originality of their work. Submitted manuscripts should not have prior or pending publication in any journal or book (print or electronic). Note: A *working paper* refers to a preliminary version of a research manuscript that is shared—typically via institutional websites or research network to invite feedback before formally submitting to a journal.

By submitting to JIPA, the authors guarantee that their manuscript is not under consideration with any other journal, in print or online. They also commit to withholding submission to other

journals until JIPA concludes its editorial decision. If these conditions present any issues, we advise the authors to contact the Editor-in-Chief.

For all studies involving human participants, authors must include the name of the approving Institutional Ethics Committee, its approval number, and preferably its DHR registration number. A clear statement confirming that written informed consent was obtained from all participants in their own language must be provided. Additionally, clinical trials must be **prospectively** registered in the **Clinical Trials Registry–India (CTRI)** for trials conducted within India, or any WHO-recognized international **registry** (e.g., ClinicalTrials.gov, EU-CTR, ANZCTR) as applicable when the trials are done in other countries. The registration number and date of registration must be clearly stated in the manuscript.

For case reports

Explicit written consent for publication must be obtained from the patient or guardian, including permission to publish images or clinical information, even when anonymity is maintained.

iii) CONFLICT OF INTEREST

All authors must disclose any potential conflicts of interest (financial or non-financial) at the end of the manuscript before the References Section. If there are no conflicts, a statement such as 'The authors declare no conflict of interest' must be included.

iv) FUNDING DISCLOSURE

Funding disclosure should be stated immediately after the 'Conflict of Interest' declaration.

Acknowledge all sources of financial support or grants. If none, state: 'No external funding was received for this work.'

v) AUTHOR CONTRIBUTIONS

Clearly define each author's role using the CRediT taxonomy.

vi) ACKNOWLEDGEMENTS

Authors may include an 'Acknowledgements section' before the 'Références Section' after the 'Funding Disclosure' to recognize individuals or institutions who contributed to the work but do not meet authorship criteria. This may include technical, editorial, or statistical assistance. Please ensure that all named individuals have written consent to be acknowledged. Personal dedication and unrelated commentary should be avoided. If copyrighted material was used, confirm that permission has been obtained and included with the cover letter.

vii) ABSTRACT AND KEYWORDS

Most article types (except Letters to the Editor and Student Section pieces) should include an abstract. Use structured abstracts (Introduction, Methods, Results, Conclusion) for original research articles. Use unstructured abstracts for other article types.

Word limit for abstracts: maximum 300 words Include 3–5 relevant keywords for indexing and discoverability.

vii) PLAGIARISM AND ARTIFICIAL INTELLIGENCE (AI) USE POLICY

Submissions must be original and free of plagiarism. If generative AI tools were used for language editing or drafting, this must be declared in the manuscript acknowledgement section.

Sample statement: “The authors used generative AI tools (mention name) to assist with grammar correction and language refinement during manuscript preparation. All content was critically reviewed and approved by the authors.”

Final responsibility for the content lies solely with the authors.

ix) LANGUAGE AND STYLE

Manuscripts must be written in clear, grammatically correct English. British English spelling is preferred. If American English is used, it must be applied consistently throughout the manuscript.

x) ORCID iD

Authors are encouraged to provide their ORCID iDs during submission for better research visibility and author identification. If you do not have one, you can register for free at:

<https://orcid.org/register>.

16.0 FORMATTING SPECIFICATIONS

File format: Microsoft Word (DOC or DOCX).

PAGE LAYOUT

Use standard US letter size (8.5" x 11") with 1-inch margins on all sides.

Font: Times New Roman, size 12 pt throughout the manuscript.

Title: 14 pt, bold, uppercase.

17.0 MANUSCRIPT STRUCTURE AND LAYOUT

No Title Page or Abstract: Please begin your document directly with the main manuscript.

Abstract: Abstract should be presented as a separate document with key words and word count of the main manuscript.

No Page Numbers, Headers, or Footers: These elements will be incorporated by the editors during the publication process.

Language: All articles must be written in English.

Single File Submission: Your complete manuscript, encompassing tables, figures, and appendices, should be submitted as a single file (Word, RTF, or PDF formats are accepted).

Page Size: The page size should be 8.5 x 11 inches.

Margins: Maintain 1.5-inch (3.8 cm) margins on all sides (left, right, top, and bottom) for the entire document, including tables and figures.

Line Spacing: The text should be double-spaced.

- **Column Layout:** Use a single-column layout. Both left and right margins should be justified.
- **Empty Space:** Endeavour to minimise empty space on pages. Ideally, no more than a quarter of a page should be left blank.

Font Guidelines

Main Body: Use 12 pt. Times New Roman

Footnotes: Use 10 pt. Times New Roman or the closest comparable font available.

Font Colour: The main body text should be black. While we encourage the use of colour in figures and maps, please consider that readers might print on black and white printers. Avoid using colours that would render material illegible when converted to black and white. Ensure no coloured mark-ups or comments remain in the final version unless intended as part of the text.

Font Faces : Generally, use Times New Roman. If a secondary font is desired for headings, a sans-serif font like Arial or Computer Modern Sans Serif is recommended.

Text Formatting and Style

Paragraph Indentation: Indent all paragraphs, except those immediately following a section heading. An indent should be at least 2 cm-spaces.

Paragraph Spacing: Do not insert extra space between paragraphs of text. Exceptions include long quotations, theorems, propositions, or special remarks, which should be set off with additional space above and below.

Widows and Orphans: Avoid "widows" (ending a page with the first line of a paragraph) and "orphans" (beginning a page with the last line of a paragraph).

Justification: All text should be left-justified.

Foreign Terms: Except for common foreign words (etc., *et al.*, *in vitro*, *in vivo*, *per capita*, *vice versa*, *status quo*) avoid using foreign words and phrases. When used, foreign terms should be set in **italics** rather than underlined.

Emphasis: Use **italics** for emphasis instead of underlining. The use of colour for emphasis is discouraged.

Headings: Distinguish headings (e.g., section starts) from the main body text using different fonts or small caps. Use the same font face for all headings and indicate hierarchy by reducing font size. Ensure space above and below headings.

Main Text: The main body text font must be black in Times New Roman

Titles: Titles of books, movies, etc., should be set in **Italics** rather than underlined.

18.0 Tables and Figures

Integrate tables and figures into the document close to their first mention in the text. Large tables or figures should occupy a page by themselves. Avoid using excessively small type in tables. Tables and figures must not be submitted as separate files during the initial submission. Ensure all tables and figures fit within the 1.5-inch margins on all sides in both portrait and landscape views. High-resolution figures, preferably encoded as Encapsulated PostScript (eps), are preferred.

Each Table and Figure should be numbered both within in-text and in Captions.

If the manuscript is accepted for publication, for final submission, figures should be submitted as separate, high-resolution image files in TIFF or JPEG formats with minimum 300 dpi resolution.

Tables should be created using Word's table tool and included in the manuscript file. Do not submit tables as images.

Captions: Captions for tables should be placed above the table and for figures, below the figures.

- Legends, explanatory notes, statistical symbols and abbreviations if any should be given as footnotes to the table/figure
- Any previously published or adapted figures must be accompanied by written permission from the copyright holder and appropriate citation.

19.0 EQUATIONS AND MATHEMATICAL NOTATIONS

Variables: Roman letters used as variables in mathematical expressions should be Italicised. Roman letters as part of multi-letter function names should not be Italicized- example: **$\sin x$** , not *$\sin x$*

Subscripts and Superscripts: Whenever possible, subscripts and superscripts should be a smaller font size than the main text.

Short Expressions: Short mathematical expressions, simple equations or formulas should appear within the body of a paragraph, rather than set apart on a new line

Longer Expressions: Longer expressions, or those with many different levels (e.g., fractions), should be presented as display math. Important definitions or concepts can also be set off as display math.

Equation Numbering: Equations should be numbered sequentially. The placement of equation numbers (right or left) is the author's choice, but consistency is crucial.

Symbols and Notation: Avoid symbols and notation in unusual fonts to enhance clarity and ensure correct display and printing.

20.0 REFERENCES

Begin the reference section after the last sentence of your submission. Insert a line break (not a page break) and begin your references on the same page, if space permits. References should appear immediately after the end of the main document

Authors are required to follow the **American Medical Association (AMA), 11th edition** referencing style. In-text citations must appear as superscript numerals, listed in the order of appearance. A complete list of references should be included at the end of the article. Please refer

to the examples provided below. For detailed rules, consult the [AMA Manual of Style](https://www.amamanualofstyle.com) (subscription required). <https://www.amamanualofstyle.com>.

AMA REFERENCE LIST FORMATTING

General Guidelines

- Number references consecutively in the order they appear in the text.
- Use Arabic numerals followed by a period.
- Do not alphabetize the reference list.
- Use the AMA abbreviation for journal names (available via PubMed).
- Include up to 6 authors; if more, list the first 3 followed by 'et al.'
